Summary

I am a versatile researcher specializing in physics simulations and AI-driven analysis, with expertise in numerical modeling, machine learning, and inference. My work focuses on leveraging advanced **scientific machine learning** methods to efficiently quantify uncertainties in **geophysical inference**, aiming to bridge the gap between computational methods and real-world applications. My research spans several key areas:

- **Scientific Machine Learning:** Educating machine learning with physical knowledge to solve PDEs efficiently: physics informed neural networks, neural operators, etc.
- **Bayesian Optimization & Inference:** Utilizing Bayesian and random fields to conduct dimensionality reduction and optimization for large-dimensional inverse problems.
- **Domain Generalization:** Creating AI generative models to encode multiple distributions, supporting uncertainty quantification with broader prior assumptions.
- **Digital Twin:** Employing imaging and computer vision computer vision techniques to render invisible physical systems based on sensory data.

Through my interdisciplinary expertise, I aim to advance the integration of AI and geophysics, driving innovation in subsurface exploration and digital simulation technologies.

Education

PhD in Civil Engineering, Georgia Institute of Technology, Atlanta, GA 2019 - 2024

- Dissertation: *Physics Informed Deep Learning Application in High-Dimensional Groundwater Inverse Modeling of Hydraulic Tomography*
- Adviser: Prof. Jian Luo

MS in Computer Engineering, Georgia Institute of Technology, Atlanta, GA 2017 - 2018

MS in Environmental Engineering, Georgia Institute of Technology, Atlanta, GA 2016 - 2017

BS in Ecology, Xiamen University, Xiamen, Fujian, China 2012 - 2016

Research Funding

Principal Investigator, ISTI FY25 Rapid Response, Los Alamos National Laboratory 2025

Teaching

Hydraulic Engineering, CEE4200, Georgia Institute of Technology 2019, 2020

Big Data for Healthcare, CSE6250, Georgia Institute of Technology 2020 – 2024

Professional Experience

Postdoc, Los Alamos National Laboratory**,** Los Alamos, NM 2024 - Present

- Authored a highly competitive research proposal and led Scientific Machine Learning Generalization project as the Principal Investigator.

- Architected and developed an R&D 100 Award-winning software for solving optimal transport problem with knowledge-driven AI models.
- Collaborated with 50+ scientists across 10+ institutions on the DOE SMART project to optimize ML-based history matching models and build industrial software infrastructure.

Research Assistant, Georgia Institute of Technology, Atlanta, GA 2019 – 2024

- **Scientific Machine Learning:** Implemented Physics Informed Neural Networks (PINNs), Fourier Neural Operator (FNO), and GAN for scalable inverse modeling of random fields following different prior distribution.
- **Numerical Inference**: Applied Bayesian optimization and random field analysis to efficiently estimate parameters and quantify uncertainties in groundwater inverse modeling. Developed and implemented upscaling methods, achieving significant acceleration in Jacobian evaluations for linear PDE systems.

Machine Learning Engineer, Schlumberger-Doll Research**,** Cambridge, MA 2023

- Reviewed cutting-edge AI methodologies and implemented generative AI for reservoir characterization and geological data synthesization.
- Built an ML infrastructure integrating Kubernetes, CUDA, Docker, and PyTorch on Azure DevOps, streamlining model training for geophysical applications.

Editorial Experience

Editor

- Guest Editor, *Hydrology* 2024 - Present

  Special Issue: Advancing Hydrological Science through Artificial Intelligence: Innovations and Applications

Reviewer

- Water Resources Research
- Journal of Hydrology
- ARMA
- SPE Journal
- Journal of Petroleum Science and Engineering

Collaborators and Co-Authors

- Jian Luo, Georgia Institute of Technology
- Minjae Kim, Georgia Institute of Technology
- Yu He, Sichuan University
- Chunhui Lu, Hohai University
- Bailian Chen, Los Alamos National Laboratory
- Martin Ma, Los Alamos National Laboratory
- Yue Zhao, Meta Platforms, Inc.
- Ming Liu, Meta Platforms, Inc.

Professional Affiliations

Member, AGU 2023 – 2024

Services and Volunteer

GUIDE Member, EES Division at Los Alamos National Laboratory 2024 – Present

DEI Association Member, CEE at Georgia Institute of Technology 2023 – 2024

President of Student Association, CEE at Xiamen University 2014 – 2015

Skills

Numerical: Numerical Linear Algebra, FEM Solver, Random Field Analysis, Bayesian Inference

Machine Learning: PINNs, Neural Operators, GANs, TensorFlow, PyTorch, Scikit-learn
Data Engineering: Python, SQL, Azure, AWS, Docker, Kubernetes, Spark, Hadoop
High-Performance Computing: CUDA, Parallel Computing Frameworks
Communication: Scientific Writing, Presentations, Teaching
